# DI-MAX Ductile Iron Elevator Buckets

The DI-MAX AA and AC style ductile iron elevator buckets are engineered to exceed the performance requirements of any industrial application. These buckets are designed with thicker walls and a reinforced front lip to increase bucket life in tough industrial environments. Ductile iron is far superior to malleable iron in both impact and abrasion resistance. Replacing malleable iron with DI-MAX ductile iron elevator buckets will result in longer bucket life and more efficient operation.

## DI-MAX DUCTILE IRON vs. MALLEABLE IRON

### DI-MAX: AVAILABLE SIZES

- 4x3 AA      • 9x6 AA      • 18x8 AA
- 6x4 AA      • 10x6 AA     • 20x8 AA
- 7x4-1/2 AA • 11x6 AA     • 24x8 AA
- 7x5 AA      • 12x6 AA     • 18x10 AA
- 8x5 AA      • 12x7 AA     • 12x8 AC
- 9x5 AA      • 14x7 AA     • 16x8 AC
- 11x5 AA     • 16x7 AA     • 18x10 AC
- 15x5 AA     • 14x8 AA     • 24x10 AC
- 19x5 AA     • 16x8 AA

Use alone or as a Digger for Maxi-Tuff AA Style plastic elevator buckets.

### WEAR & CAPACITY COMPARISON

DI-MAX DUCTILE IRON

Capacity: 67.0 cubic inches  
Size: 8x5 AA

MALLEABLE IRON

Capacity: 23.1 cubic inches  
Size: 8x5 AA

Run side by side in a durability test, the DI-MAX Ductile Iron Bucket demonstrates superior abrasion resistance, while the malleable bucket shows severe signs of wear.

With a maximum volume of 67.0 cubic inches (compared to only 23.1 cubic inches for the malleable iron bucket) the DI-MAX delivers 65.5% more carrying capacity.
