AN IMPRESSIVE COMBINATION:

RANKED #1: TIGER-TUFF

The maximum duty TIGER-TUFF is the toughest, longest lasting, plastic elevator bucket. With 24 of the top 25 grain companies in North America specifying the TIGER-TUFF for their harshest applications, customers understand that the thicker lip, corners, and back make the TIGER-TUFF last longer than all of the other plastic buckets.

TM

RANKED #2: HD-MAX

In less than a year, the HD-MAX has become America's fastest growing heavy-duty elevator bucket. And no wonder, the heavy duty HD-MAX elevator bucket is on average 9.3% heavier, and carries 10.9% more grain and feed than the standard duty cc-hd buckets. The HD-MAX is available in 21 sizes, 3 unique materials, and 2 different profiles.

RANKING ELEVATOR BUCKETS BY THICKNESS, WEIGHT, AND CAPACITY: TAPCO KO'd!

The Tiger-Tuff and HD-MAX were Ranked #1 and #2 in all major categories related to thickness, weight and capacity. The thicker corners, lip and back of the Maxi-Lift products provide longer life and less breakage. The greater capacity allows for more material to be elevated in a shorter period of time.

The 16x8 sized elevator bucket was used for comparison purposes. The thickness information was tested by an outside, non-biased testing agency (AGP Laboratories). The capacity and weight information were acquired from manufacturers' catalogs. All information is available for review.
